Journal**

## ***Green Economics World Policy*** (GEWP)

**Economics and global policy for the 21<sup>st</sup> Century**

**ISSN (Online): ISSN (Print):**

**Issue 1 Volume 1 2015**

### **Our Academic Journal**

**Invitation to write**

We are pleased to receive articles for our academic journal ***Green Economics World Policy*** which will come out 4 times a year with rolling deadlines, so you can always submit your papers, abstracts and ideas. It is academic, with Harvard style referencing, no footnotes, and is *double blind peer reviewed*. Many of our writers have enhanced their careers by publishing in our journal, for example obtaining promotion to Professor or becoming a Director of a major NGO or business and many other improvements to their careers or getting jobs they had always dreamed of.

There is a queue to get into this popular journal – It will be the first and only one of its kind in the world. It will be founded by Miriam Kennet and Michelle Gale.

**For 2015**-we have places in 1 issue and for about 10 articles, so we are currently taking up to 10 general and specific articles/papers in 2015 for Volume 1 issue 1.

**We also especially encourage papers *about* – international affairs and global politics, economics, environment and sustainability, development and co-operation, poverty and inequality, women, equal opportunities and economic equity.**

**We will accept 10 papers in 2015 under the wide and broadest umbrella of *Green Economics World Policy*.**

**The Deputy and Guest Editors for 2015 and 2016 are being appointed at the moment. Please apply if you would like to be considered.**

Authors are also encouraged to write for the Green Economics Institute's Books as well and many of our

authors have published in both.

We welcome diverse contributions and we especially like to welcome and help with contributions from new writers and innovative ideas and also from Professors and Nobel Prize Winners and anything in between. The writing and papers for the journal have to be between **2500 and 7000 words**. We cover academic, polemic, simple and more complex writing, political, academic, campaigning and business styles of writing.

The journal is gender **balanced** and balanced between developing countries and developed country authors and also north south east and western Europe, Africa, Asia, and other areas. BRICS, and MINTs etc. It is also multi and inter disciplinary and also pluralist and heterodox. So please send in your articles as soon as possible. They can take several months to double blind review depending on the subject as many of them get reviewed by several subject specialists to achieve this ground breaking mix. Sometimes however papers can go through within a month.

Please ensure you cite any items you have not written yourself and photos must all be attributed to who took them. References must be Harvard style- and we do not accept footnotes and papers must be sent in .odt, or .doc formats, (not pdfs). Please ask for further information or guidance if you need it. Please ensure you do not infringe anyone else's copyright.

### **Academic citations for your Professional objectives**

All our writers and authors do get an academic citation when they publish with us in our academic journal and our academic book series, including appearing on google scholar and many of the search engines used by Universities and the academic journal **Green Economics World Policy** will be read in every continent and in some of the most prestigious libraries on the planet, so it will get your ideas out around the world! Many academics and people working in academia need to publish in peer reviewed journals as a condition of their jobs or for promotion and this journal, **Green Economics World Policy** meets those requirements for you.

*We are very keen to encourage new writers and new ideas as well as more experienced writers and academics and policy makers and business people and campaigners. All the issues are gender balanced and diverse and are written by people from all corners of the earth.*

We look forward to hearing from you very soon and to your writing for this exciting journal. Please email us in the first instance, and we will be pleased to discuss your idea and we will be very keen to encourage you and help you during the writing.

All we look for are the ideas, and we can develop any good ideas with you into a piece of suitable writing and we specialise in developing new writers and publishing new and other voices which are not usually heard!

**Email us today with your idea for an article -and submissions:**

## *About the Academic Journal Green Economics World Policy*

*GEWP* addresses all aspects of Green Economics, aiming to encourage economic change and positioning Green Economics at the centre of the Economics disciplines and world policy. Green Economic theories, policies, tools, instruments and metrics are developed to facilitate a change to the current economic models and policy making for the benefit of the widest number of people and the planet as a whole. *GEWP* focuses particularly on resource management, international politics and policy-making, meeting peoples' needs and inequity, political power structures and relations and the impact and effects of international trends and how to increase social and environmental justice.

### **Objectives**

The objectives of *GEWP* are to establish an effective channel of communication between policy makers, government agencies, academic and research institutions concerned with the running, involvement and global impact of the economy on all sections of society and the environment. It aims to bridge the gap between academic economic theory and the literature and suggestions for the implementation of modern concepts in the political economy and the general economic debate, structures of political power and public discussion.

The development of an alternative view in contrast to the traditional normatively biased view of economics, narrow mainstream politics and policy making is the prime objective. The study of Green Economics naturally has to be very multi and interdisciplinary in nature, as the problems it addresses are partly social in aspect and causes, partly scientific in technical development, partly environmental as this is a fundamental limit to all human activity and partly economic and historical in how the current situations have evolved. Green Economics is also particularly influenced by developments in ethical thinking and values and in anthropology in its explanations of past and future trends.

The advisory board consists of a host of academics and practitioners, government members, policy makers and campaigners from around the world in order to meet the demands and the wide scope of the subject.

### **Readership**

*GEWP* provides a vehicle to help professionals, academics, researchers, policy makers and campaigners working in the fields of international business, economics and local, regional and national government to educate, influence, lobby and share information and to learn from each others' work and best practice in the field as well as to provide a forum to explore new solutions to economic problems and global policy concerns.

**Editors of Green Economics World Policy Contact : 44 (0) 7990 590463**
